-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

**Period for Reply**

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

**Status**

- 1) ☒ Responsive to communication(s) filed on 16 January 2004.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

## **DETAILED ACTION**

### ***Specification***

The disclosure is objected to because of the following informalities:

The specification has no titles indicating the various parts of the application, the disclosure is replete with misspellings, as well as awkward grammar and apparent typographical errors. Applicant is responsible for proofreading the application and making all necessary corrections.

Appropriate correction is required.

### ***Claim Rejections - 35 USC § 112***

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 1-3 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

The structure which goes to make up the device must be clearly and positively specified consistent with U.S. Patent practice. The structure must be organized and correlated in such a manner as to present a complete operative device. Applicant must redraft the claims in a form consistent with U.S. Patent practice.

***Claim Rejections - 35 USC § 103***

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1-3, as understood, are rejected under 35 U.S.C. 103(a) as being unpatentable over admissions of prior art on page 1 of the disclosure in view of Liardet ('790). Applicant's admission on page 1 of the disclosure states that laminated floor comprising compressed cellulose sheets impregnated with polymerisable resins are known. The admission of prior art lacks the provision of peripheral edges being of reduced thickness with respect to the remainder of the floor (panel). Liardet teaches a decorative leather floor panel comprising compressed leather having peripheral edges being of reduced thickness for simulating tiles having mortar between adjacent ceramic tiles. In order to simulate mortar between adjacent tiles, it would have been obvious to one having ordinary skill in the art at the time the invention was made to provide the peripheral edges of the admitted prior art with a reduced thickness as is suggested by Liardet.
